Despite all that goodness, the 8200 also has its own share of - if you consider it to be- flaws, which is the stuttering seconds-hand, but beautifully covered up by counter-balancing the tail. Though a bit out of the context, Citizen employed a sandwiched third wheel into the mechanism, thus eliminating the pressure spring in the new caliber 9015.

Unlike the 8200, these two calibres had only a very limited production life as Citizen made quartz watches their priority. The 8000 line was notable for the first use by Citizen of a uni-directional winding rotor, which was sustained by the 8200. For reference, the date only version uses the 8210 movement.
