How can stored energy be changed into movement energy? ... When we stretch an elastic band, we store energy in it. This is because when the band is stretched, it can do work when you release it. We are going to look at some other ways of using stretched elastic bands to do ... can twist the elastic band. This is for next week. Author: Sagren ...

Designers create tension springs to resist stretching and store energy when stretched, while they create torsion springs to resist twisting and store energy when twisted. Factors That Affect the Amount of Energy Stored. Several factors can influence the potential energy a spring can store. Wire diameter is a critical factor.

Kinetic Carousels demonstrate two types of energy: potential energy and kinetic energy. Potential Energy is stored energy. When the rubber band is tightly wound it has a lot of energy, but until you let go, the energy is stored up waiting to be unleashed; we call this potential energy. Kinetic energy is the energy of an object in motion.
