

Triboelectric nanogenerators (TENGs) are emerging as a form of sustainable and renewable technology for harvesting wasted mechanical energy in nature, such as motion, waves, wind, and vibrations. TENG devices generate electricity through the cyclic working principle of contact and separation of tribo-material couples. This technology is used in ...

Comparing to conventional energy materials, carbon nanomaterials possess unique size-/surface-dependent (e.g., morphological, electrical, optical, and mechanical) properties useful for ...

Nanotechnology has opened up new frontiers in materials science and engineering to meet this challenge by creating new materials, particularly carbon nanomaterials, for efficient energy conversion and storage. Comparing to conventional energy materials, carbon nanomaterials possess unique size-/surface-dependent (e.g., morphological, electrical ...

In this work, to obtain a calcium-based material with high cyclic energy storage capacities, high energy release rates, high sinter resistance, and high mechanical properties, the MgO/ZnO co-doped CaO honeycomb was fabricated for CaO/CaCO<sub>3</sub> TCES. The energy storage performance and the mechanical strength property of the MgO/ZnO co-doped CaO ...

Nanomaterials For Energy Conversion And Storage. Qifeng Zhang;Evan Uchaker;Stephanie L. Candelaria;Guozhong Cao;Guozhong Cao. (2017) 1336 Citations Developments in Nanostructured Cathode Materials for High-Performance Lithium-Ion Batteries. ... Qifeng Zhang;Guozhong Cao. Nano Today (2011) 746 Citations

6 &#0183; Energy-storage performance of the (BNT-BT)-xCBST samples. a) The room temperature unipolar P-E loops of the (BNT-BT)-xCBST ceramics measured at their E<sub>b</sub> and 10 ...

Thermochemical energy storage with CaO/Ca(OH)<sub>2</sub> - experimental investigation of the thermal capability at low vapor pressures in a lab scale reactor. Appl Energy, 188 (2017), pp. 672-681, 10.1016/J.APENERGY.2016.11.023. View PDF View article View in Scopus Google Scholar [41]

CaCO<sub>3</sub>/CaO materials possess the advantages of low cost, high energy storage density, and working temperature, which offer these materials the potential to be used in thermochemical energy storage systems for concentrated solar power plants. However, CaCO<sub>3</sub>/CaO materials possess poor antisintering and optical absorption abilities, largely ...

Fuqin Sun, Yang Gu, Yudong Cao, Qifeng Lu, Yuanyuan Bai, Lianhui Li, Mingming Hao, Chunyan Qu, Shuqi Wang, Lin Liu, Tie Li, Ting Zhang\* ... Novel coaxial fiber-shaped sensing system integrated with an asymmetric supercapacitor and a humidity sensor Energy Storage Materials, 2018, 315-323. 2018-05-18., \*,

A nano-Fe<sub>3</sub>O<sub>4</sub> and erythritol (ER)-functionalized, cross-linked methyl cellulose aerogel (MC-EP) composite that has the characteristics of phase-change energy storage as the magnetic and ultraviolet responses requisite for light-to-heat conversion and storage and provided a way to prepare light- to- heat conversion-storage-release materials and ...

DOI: 10.1016/j.pmatsci.2023.101227 Corpus ID: 266309632; Synthesis, Properties, and Applications of MXenes and their Composites for Electrical Energy Storage @article{Bi2023SynthesisPA, title={Synthesis, Properties, and Applications of MXenes and their Composites for Electrical Energy Storage}, author={Wenchao Bi and Guohua Gao and Chao Li ...

The intermittent and inconsistent nature of some renewable energy, such as solar and wind, means the corresponding plants are unable to operate continuously. Thermochemical energy storage (TES) is an essential way to solve this problem. Due to the advantages of cheap price, high energy density, and ease to scaling, CaO-based material is thought as one of the most ...

Supercapacitors (SCs) have been gaining a great deal of interest as the appealing energy storage devices because of the outstanding power density and ultralong cycling features. Electrode materials as the active energy reservoir store the electrons and/or ions in the electrochemical process, determining the performance of the devices.

Ervin et al. have conducted experimental laboratory tests on small quantities of Ca(OH)<sub>2</sub> and have demonstrated the cyclability of the Ca(OH)<sub>2</sub>/CaO thermochemical loop [11]. The measured capacity of Ca(OH)<sub>2</sub> was 95 % which remained unchanged during the 211 conducted dehydration/hydration cycles. Moreover, they have demonstrated that the reaction ...

Crossref; Google Scholar [27] Yu J, Wang Q, O'Hare D et al 2017 Preparation of two dimensional layered double hydroxide nanosheets and their applications Chem ...

Coherent Carbon - Hydride Nanocomposites for H<sub>2</sub> Storage Bellevue Community College, WA Aaron M. Feaver - 01/20/2007 Nanostructured Carbon Cryogels for Efficient Energy Storage EnerG2, WA (co-founder and CTO) Tammy P. Chou - 08/11/2006

To prevent and mitigate environmental degradation, high-performance and cost-effective electrochemical flexible energy storage systems need to be urgently developed. This demand has led to an increase in research on electrode materials for high-capacity flexible supercapacitors and secondary batteries, which have greatly aided the development of ...

title={Thermochemical energy storage performance of papermaking soda residue during CaO-CaCO<sub>3</sub> cycles},  
author={Caili Li and Yingjie Li and ...}

CaCO<sub>3</sub> is a promising material for thermochemical energy storage (TCES) systems. It can store and release heat upon reversible decarbonation to CaO, which emits heat through carbonation. Decarbonation temperature of CaCO<sub>3</sub> directly affects the properties of CaO, which influences heat supply in result. The current research studies CaCO<sub>3</sub>/CaO system, ...

Energies 2023, 16, 3019 3 of 23 LiOH, Na<sub>2</sub>Si<sub>3</sub>O<sub>7</sub>, and nano-SiO<sub>2</sub>) on the heat storage materials. Wang et al. [25] summarized research on the physical and chemical properties of Ca(OH)<sub>2</sub> (such as ...

CaCO<sub>3</sub>/CaO thermochemical energy storage based on concentrated solar power plant is a promising technology because of its high working temperature and energy storage capacity. Papermaking white mud (PWM) from paper mill is a potential CaO-based precursor due to its high content of CaCO<sub>3</sub>. Herein, a novel Ca<sub>3</sub>B<sub>2</sub>O<sub>6</sub>-modified PWM was ...

Obermeier et al. [40] synthesized Al<sub>2</sub>O<sub>3</sub>/CaO composite by the liquid phase self-propagating synthesis containing different Al<sub>2</sub>O<sub>3</sub> contents for CaO/CaCO<sub>3</sub> energy storage and found 5 wt.% Al<sub>2</sub>O<sub>3</sub> in CaO-based composite possessed the highest energy storage capacity and energetic efficiency, which were 3.5 and 1.2 times higher than those of ...

One of the greatest challenges for our society is providing powerful electrochemical energy conversion and storage devices. Rechargeable lithium-ion batteries and fuel cells are amongst the most promising candidates in terms of energy densities and power densities. Nanostructured materials are currently of interest for such devices because of their ...

DOI: 10.1002/cssc.200800087 Corpus ID: 28547175; Oriented nanostructures for energy conversion and storage. @article{Liu2008OrientedNF, title={Oriented nanostructures for energy conversion and storage.}, author={Jun Liu and Guozhong Cao and Zhenguo "Gary" Yang and Donghai Wang and Daniel L. Dubois and Xiao-Dong Zhou and Gordon L. Graff and Larry R. ...}

Thermochemical energy storage is an essential component of thermal energy storage, which solves the intermittent and long-term energy storage problems of certain renewable energy sources. The appropriate decomposition temperature, high heat storage capacity of the CaO/Ca(OH)<sub>2</sub> system makes it one of the successful thermochemical energy ...
