

1. Introduction. Electrical Energy Storage (EES) refers to a process of converting electrical energy from a power network into a form that can be stored for converting back to electrical energy when needed [1-3] ch a process enables electricity to be produced at times of either low demand, low generation cost or from intermittent energy sources and to be used at ...

Energy Storage is a new journal for innovative energy storage research, ... Haisheng Chen, Institute of Engineering Thermophysics, Chinese Academy of Sciences, Beijing 100191, China. ... The data that support the findings of this study are available from the corresponding author upon reasonable request. REFERENCES, ...

Haisheng Chen, Institute of Engineering Thermophysics, Chinese Academy of Sciences, 11 Beisihuanxi Rd, Beijing 100190, China; University of Chinese Academy of Sciences, No. 19(A) Yuquan Rd, Beijing 100049, China; National Energy Large Scale Physical Energy Storage Technologies R& D Center of Bijie High-tech Industrial Development Zone, Bijie ...

The oblique flow compressor is one of the important components in the compressed air energy storage (CAES) system. The structural shape of the radial inlet chamber (RIC) directly affects the compressor performance, and a reasonable RIC design should achieve the smallest total pressure loss and outlet distortion as much as possible to meet the structural ...

Volume 47 Megawatt Isobaric Compressed Air Energy Storage: an Experimental Study on the Discharge Process Changchun Liu, Zhao Yin, Xu Su, Xuehui Zhang, Zhitao Zuo, Yong Sheng, Xuezhi Zhou, Xudong Wang, Yujie Xu, Haisheng Chen

Chen Haisheng, Chairman of the China Energy Storage Alliance: When judging the progress of an industry, we must take a rational view that considers the overall situation, development, and long-term perspective. In regard to the overall situation, the development of energy storage in China is still proceeding at a fast pace.

Haisheng Chen: Writing - review & editing, Resources, Project. ... To improve the energy efficiency and economic performance of the compressed air energy storage system, this study proposes a design for integrating a compressed air energy storage system with a biomass power generation system. In the energy storage process, the feedwater from ...

Mathematical and thermo-economic analysis of thermal insulation for thermal energy storage applications. Thermal energy storage (TES) is vital for achieving carbon neutrality in the...

Modelling study, efficiency analysis and optimisation of large-scale Adiabatic Compressed Air Energy Storage systems with low-temperature thermal storage. Contents lists available at...

Economic evaluation of energy storage integrated with wind power Xinjing Zhang^{1,2*}, Lu Feng¹, Xiaoyu Li¹, Yujie Xu ^{1,2}, Liang Wang ^{1,2} and Haisheng Chen^{1,2*} Abstract Energy storage can further reduce carbon emission when integrated into the renewable generation. The integrated ... A case study was analyzed with respect to yearly wind genera-

In this paper we investigated the dynamic performance of a specific Adiabatic Compressed Air Energy Storage (A-CAES) plant with packed bed thermal energy storage (TES). We developed ...

China is now the most active country in energy storage fundamental study and also one of the core countries of technical research and demonstration. Key words ... CLC Number: TK 02 Cite this article. Haisheng CHEN, Hong LI, Wentao MA, Yujie XU, Zhifeng WANG, Man CHEN, Dongxu HU, Xianfeng LI, Xisheng TANG, Yongsheng HU, Yanwei MA, Kai JIANG, Hao ...

Compressed Air Energy Storage (CAES) that stores energy in the form of high-pressure air has the potential to deal with the unstable supply of renewable energy at large scale in China. ... Haisheng & Xu, Yujie & Li, Wen & He, Fengjuan & Guo, Huan & Huang, Ye, 2017. "Distributed generation with energy storage systems: A case study," Applied ...

Dynamic simulation of Adiabatic Compressed Air Energy Storage (A-CAES) plant with integrated thermal storage - Link between components performance and plant performance ... To the authors' knowledge the present study is the first of this kind for an A-CAES plant. Graphical abstract. Download: ... Haisheng Chen, Thang Ngoc Cong, Wei Yang ...

The shift to clean energy and the promotion of renewable energy sources are the dominant trends in the sustainable development of global energy employment. Thermal energy storage (TES) technology can help reduce the mismatch between thermal energy supply and demand by smoothing out peak demand periods. The spray-type packed bed thermal energy storage is an ...

Principal Investigator: Haisheng Chen | ResearchGate, the professional network for scientists ... Heat transfer characteristics of the innovative spray-type packed bed thermal energy storage: An ...

The first hard rock shallow-lined underground CAES cavern in China has been excavated to conduct a thermodynamic process and heat exchange system for practice. The thermodynamic equations for the solid and air region are compiled into the fluent two-dimensional axisymmetric model through user-defined functions. The temperature regulation model and ...

The implementation of this step change will be possible only through efficient and economic grid-scale electrical energy storage. In this paper we study the operation of a 220MWe adiabatic compressed air energy storage (ACAES) plant with a packed bed thermal energy storage. ... Haisheng Chen Thang Ngoc Cong Wei Yang Chunqing Tan Yongliang Li ...

Energy storage has the potential to meet this challenge and enables large scale implementation of renewables. ... Christopher & Wang, Yue & Sheng, Yong & Li, Jian & Xu, Yujie & Wang, Dan & Miao, Shihong & Chen, Haisheng, 2016. "Modelling study, efficiency analysis and optimisation of large-scale Adiabatic Compressed Air Energy Storage systems ...

In the present study, aerodynamic performance of a four-stage reheating radial inflow turbine, which is adopted in the 1.5 MW supercritical compressed air energy storage system, is analyzed by using the method of integral numerical calculation.

Energy storage technology is an essential part of the efficient energy system. Compressed air energy storage (CAES) is considered to be one of the most promising large-scale physical energy storage technologies. It is favored because of its low-cost, long-life, environmentally friendly and low-carbon characteristics. The compressor is the core ...

Shao Z. Study on the internal flow and loss mechanism of turboexpander in the compressed air energy storage system. PhD Thesis. PhD Thesis. CA: University of Chinese Academy of Sciences, 2021.

Energy storage possesses huge market demand. Until 2018, global installed energy storage capacity is about 181 GW, covering 2.9% of global installed power generation capacity. In ...

This study presents a numerical investigation on a cascaded shell-and-tube 3PCMs latent heat thermal storage unit filled with three types of phase-change materials namely, C 24 H 50, C 21 H 44, and C 18 H 38. The mathematical model is based on the enthalpy method and considers the effect of the natural convection of liquid phase-change material during melting.

Semantic Scholar profile for Haisheng Chen, with 391 highly influential citations and 288 scientific research papers. ... Progress in electrical energy storage system: A critical review. Haisheng Chen Thang Ngoc Cong Wei Yang Chunqing Tan Yongliang Li Yulong Ding. Engineering, Environmental Science. ... A Benchmark Study on the Thermal ...

Alongside with pumped hydroelectricity storage, compressed air energy storage (CAES) is among the few grid-scale energy storage technology with power rating of 100 s MW [6], [7]. CAES operates in such a way that electrical energy is stored in the form of compressed air confined in a natural or artificial reservoir.

Dynamic simulation of Adiabatic Compressed Air Energy Storage (A-CAES) plant with integrated thermal storage - Link between components performance and plant performance ... To the authors' knowledge the present study is the first of this kind for an A-CAES plant. Original language: English: ... Chen, Haisheng et al. In: Applied Energy, Vol ...

Energy Storage Science and Technology >> 2023, Vol. 12 >> Issue (5): ... Haisheng CHEN 1 (), Hong LI 2, Yujie XU 1, ... By reviewing and analyzing three aspects in terms of fundamental study, technical research,

integration and demonstration, the progress on China's energy storage technologies in 2022 is summarized including hydro ...
