All automakers currently offer at least an eight-year, 100,000-mile warranty on EV battery packs. Tesla offers an eight-year battery warranty, and depending on the range and type of vehicle, coverage for 100,000 to 150,000 miles. This guarantee isn't just against the complete failure of a battery pack, but against degradation.

FACT: Electric vehicles (EVs) typically have a smaller carbon footprint than gasoline cars, even when accounting for the electricity used for charging, plus they are far more efficient when it comes to energy use. Electric vehicles (EVs) have no tailpipe emissions. Generating the electricity used to charge EVs, however, may create carbon pollution.
