

We report here the first successful demonstration of a "p-conjugated redox polymer" simultaneously featuring a p-conjugated backbone and integrated redox sites, which can be stably and reversibly n-doped to a high doping level of 2.0 with significantly enhanced electronic conductivity. The properties of such a heavily n-dopable polymer, poly{[N,N'-bis(2 ...

5 · DNA nanotechnology has revolutionized materials science by harnessing DNA's programmable properties. DNA serves as a versatile biotemplate, facilitating the creation of ...

Sulfur vacancy-rich MoS₂ as a catalyst for the hydrogenation of CO₂ to methanol. Jingting Hu, Liang Yu, Jiao Deng, Yong Wang, Kang Cheng, Chao Ma, Qinghong Zhang, Wu Wen, Shengsheng Yu, Yang Pan, Jiuzhong Yang, Hao Ma, Fei Qi, Yongke Wang, Yanping Zheng, Mingshu Chen, Rui Huang, Shuhong Zhang, Zhenchao Zhao, Jun Mao, Xiangyu Meng, Qinqin ...

Sodium niobate (NaNbO₃, NN)-based lead-free antiferroelectric (AFE) ceramics are currently the focus of most attention on account of their outstanding energy storage density. Nevertheless, the high loss energy density (W_{loss}) by unique field-induced AFE-ferroelectric (FE) phase transition in pure NN ceramic and low breakdown electric field (E_b) largely restrict their ...

DOI: 10.1016/J.EGYR.2021.02.040 Corpus ID: 234083618; Energy Storage driving towards a clean energy future @article{Lu2021EnergySD, title={Energy Storage driving towards a clean energy future}, author={Yiji Lu and Haisheng Chen and Liwei Wang and Zitao Yu and Huang Yuqi and Xiao-li Yu and Yaodong Wang and Anthony Paul Roskilly}, journal={Energy Reports}, ...

As an energy storage device, the as-assembled device provides open-circuit voltages up to 3.5 V (Al anode/Ti-V₂O₅ cathode) with an areal capacity of up to 933 mA h m⁻² (Al/Ti-V₂O₅ and Al/WO₃), which are the best among those of all reported EES devices. Meanwhile, the utilization of the mixed Li/Al-ion electrolyte and the addition of ...

Articles from the Special Issue on Modern Energy Storage Technologies for Decarbonized Power Systems under the background of circular economy with sustainable development; Edited by Ruiming Fang and Ronghui Zhang ... Wei-Xiang Cheng, Ting-Ting Mao, Yi-Zhao Chen, Shuai-Fu Cui, ... Yong-Gang Min. Article 110709 View PDF.

Moreover, the Ti₃C₂T_x-based SCs show an energy density of 33.2 Wh L⁻¹ in the mixed electrolyte, which is much higher than that in the H₂SO₄ electrolyte (14.3 Wh L⁻¹). ...

Since every energy harvester working alone in practical application inevitably faces the shared challenge of discontinuous source energy (e.g., intermittent motion, sunlight, biofuel, etc.), the synergy strategy of hybridizing different energy harvesters is highly valued due to its benefits of scavenging energy sources surrounding the wearer ...

Hui Chen. Key Laboratory of the Ministry of Education for Advanced Catalysis Materials, Department of Chemistry, Zhejiang Normal University, Jinhua, 321004 China ... As one of the most appealing energy storage technologies, aqueous zinc-iodine batteries still suffer severe problems such as low energy density, slow iodine conversion kinetics ...

The Journal of Energy Storage focusses on all aspects of energy storage, in particular systems integration, electric grid integration, modelling and analysis, novel energy storage technologies, ...

In this paper, a new operational mode is proposed for energy storage, in which an improved semi-centralized mechanism is proposed for energy storage to participate in the day-ahead energy market. The new operational mode, i.e., the flexible state-of-energy (SOE) mode, is proposed based on the previous fixed SOE mode, under which the final SOE of energy storage at the ...

With the development of renewable energy sources, supercapacitors (SCs) have drawn considerable attention due to their high rate performance and power density. $\text{Ti}_3\text{C}_2\text{Tx}$ (MXene) shows an excellent physical and chemical nature, making it a promising electrode material for SCs. Here, $\text{Ti}_3\text{C}_2\text{Tx}$ -based symmetric SCs are examined by employing in situ Raman and X ...

Li-Feng Zhu, Shiqing Deng, Lei Zhao, Gen Li, Qi Wang, Linhai Li, Yongke Yan, He Qi, Bo-Ping Zhang, Jun Chen, Jing-Feng Li, Heterovalent-doping-enabled atom- displacement fluctuation leads to ultrahigh energy-storage density in AgNbO_3 -based multilayer capacitors. Nature Communications 14, 1166 (2023). [5].

@article{Chen2024OutstandingES, title={Outstanding energy storage properties and dielectric temperature reliability in $\text{Na}_{0.35}\text{Bi}_{0.35}\text{Sr}_{0.3}\text{TiO}_3$ -based relaxor ferroelectrics ...

Her work pioneers in discovering and designing better materials for energy storage by a unique combination of first principles computation guided materials discovery and design, and advanced characterization with electron/neutron/photon sources. Dr. Meng is the principal investigator of the Laboratory for Energy Storage and Conversion . She ...

In this work, we have selected a representative pseudocapacitive material of manganese dioxide (MnO_2) film as the complementing electrode of tungsten trioxide (WO_3) film to construct a smart electrochromic energy storage device (EESD), with the aim to simultaneously provide the optical modulation and energy storage performance. WO_3 and MnO_2 films have ...

Wearable solar energy management based on visible solar thermal energy storage for full solar spectrum utilization Liang Fei, Yunjie Yin, Mengfan Yang, Shoufeng Zhang, Chaoxia Wang Pages 636-644

In this work, we have selected a representative pseudocapacitive material of manganese dioxide (MnO_2) film as the complementing electrode of tungsten trioxide (WO_3) film to construct a ...

Joule heating, a fundamental process converting electrical energy into heat, can be used to prepare many materials for energy storage. This review explores the multifaceted ...

Polymer dielectrics with a high energy density and an available energy storage capacity have been playing an important role in advanced electronics and power systems. Nevertheless, the use of polymer dielectrics in harsh environments is limited by their low energy density at high temperatures. Herein, zirconium dioxide (ZrO₂) nanoparticles were decorated ...

The increasingly intimate contact between electronics and the human body necessitates the development of stretchable energy storage devices that can conform and adapt to the skin. Therefore, the development of stretchable batteries and supercapacitors has received significant attention in recent years. ... Chen, Po-Yen; Zhang, Mengke; Liu ...
