2021 Deloitte Renewable Energy Seminar 10. Financing depends heavily on tax incentives o Tax equity investments in solar generation often price as a multiple of the ITC o If a deal prices at 1.2x, and tax equity is expected to be allocated an ITC of \$30 million, tax equity will invest \$36 million ( $=30 \times 1.2$ )

o The solar investment tax credit (ITC) is a tax credit that can be claimed on federal corporate income taxes for 30% of the cost of a solar photovoltaic (PV) system that is placed in service during the tax year.<sup>1</sup> (Other types of renewable energy are also eligible for the ITC but are beyond the scope of this guidance.)

The United States and global energy storage markets have experienced rapid growth that is expected to continue. An estimated 387 gigawatts (GW) (or 1,143 gigawatt hours (GWh)) of new energy storage capacity is expected to be added globally from 2022 to 2030, which would result in the size of global energy storage capacity increasing by 15 times ...

o Energy storage devices that are charged exclusively by the associated solar PV panels, even if the storage is placed in service in a subsequent tax year to when the solar energy system is installed (however, the energy storage devices are still subject to the installation date requirements) 6 o Sales taxes on eligible expenses.

2. Do not reassess lease classification for any expired or existing leases 3. Do not reassess initial direct costs Impacts on Renewables projects: Sales-type or direct financing lease with significant variable payments may result in lessor recognizing a loss at commencement o Net investment in the lease does not include variable lease payments

Tax credits up to \$7,500 are available for eligible new electric vehicles and up to \$4,000 for eligible used electric vehicles. You can claim the credit yourself or work with your dealership. Tax credits are available for home chargers and associated energy storage, each up to \$1,000. Make sure you meet the requirements below.

The proposed regulations provide that a taxpayer may claim a Section 48E credit for a unit of qualified facility or energy storage technology if the taxpayer directly owns at least a fractional ...

## Energy storage lease service tax

The U.S. federal government offers tax incentives for investing in renewable energy projects, including investment tax credits ("ITC"), production tax credits ("PTC"), and accelerated depreciation. Few developers are able to use the benefits directly. Tax equity transactions allow investors to monetize those benefits.
