

# Energy storage module investment of us\$1 billion

Public market financing totaled US\$7.4 billion, 45% higher than 2022's US\$5.1 billion. Mergers & acquisitions (M& A) activity declined by 25% in 2023, from 128 deals in 2022 to 96 in 2023.

Mercom Capital reported the U.S. invested \$9.2 billion of venture capital in energy storage in 2023. Venture capital funding in energy storage reached new heights in 2023, according to Mercom Capital, which reported that U.S. firms invested \$9.2 billion in energy storage ventures throughout the year. This represents a 59% year-over-year increase.

The US Department of Energy (DOE) has provided dates and a partial breakdown of grants totalling US\$2.9 billion to boost the production of batteries for the electric vehicle (EV) and energy storage markets, as promised by President Biden's Bipartisan Infrastructure Deal.

The World Bank has committed US\$1.5 billion in financing to support India's renewable energy transition, with the money going towards the production of green hydrogen and the development of new ...

Mercom publishes the reports on a quarterly basis and it found that battery storage was by far the biggest sector among the three for corporate funding; smart grid companies raised US\$471 million in 18 deals, energy efficiency US\$348 million from three deals. The US\$9.6 billion of corporate funding into battery storage came from 41 deals.

The \$1 billion in World Bank Group financing is expected to mobilize another \$4 billion in concessional climate financing and public and private investments. The program aims ...

Total VC funding across battery storage, smart grid and energy efficiency was US\$10.1 billion for the year -- again a big jump from 2020's US\$2.6 billion. "VC investments into battery storage companies exploded in 2021, and for the first time, funding activity reflected the significance of battery energy storage in the energy transition ...

(He has said in previous interviews that the 2022 figure was expected to be US\$600-700 million. Fluence's financial year 2023 revenue guidance offered back in December is in the range of US\$1.4 billion to US\$1.7 billion, while Tesla does not break out its energy storage revenues separately - Editor's note)

The Committee noted that this was an increase of US\$1.26 billion - or 3% - above the 2020 equivalent Bill. Also included was US\$43.5 billion of emergency spending for the repair of water infrastructure and the modernisation of energy infrastructure. The bill now heads to the full committee for markup.

A real estate and infrastructure investment arm of BlackRock has committed to investing a billion Australian Dollars (US\$700 million) into growing an Australian developer's energy storage business. BlackRock Real

energy storage projects.

The projects form part of the US\$2.5 billion Transmission Facilitation Program, aimed at developing the US power grid. Image: Shutterstock. The US Department of Energy has invested US\$1.5 billion ...

Sosteneo will take a 49% stake in Enel Libra Flexsys with parent company Enel Italia S.p.A holding the remaining 51%, retaining control over the company. The deal, which will see Sosteneo's "Sosteneo Fund 1 HoldCo S.&#224;.r.1" pay EUR1.1 billion (US\$1.19 billion) for the stake, values Enel Libra Flexsys at EUR2.5 billion.

Energy storage saw a fourth consecutive quarter in which projects secured financial investment commitments of over AU\$1 billion (US\$660 million). According to the report, four storage projects, representing 760MW/1,640MWh, received a financial commitment.

The US\$12.9 billion amount attracted by battery storage companies across 26 deals during the first quarter of 2022 included US\$1.1 billion of VC money and US\$11.7 billion in debt and public market financing. It utterly dwarfs the total US\$316 million for smart grid companies and US\$109 million for energy efficiency in the same period.

Significant return on investment, with every dollar spent on transmission meaning approximately \$1.60 to \$1.80 in system costs is saved. When transmission regions coordinate to achieve resource adequacy, system costs through 2050 are lowered by \$170 billion-\$380 billion.

For this, AEMO calls for AU\$16 billion to be invested in several projects, all of which could recoup their investment costs, save consumers AU\$18.5 billion in avoided energy costs, and deliver ...

Lithium-ion based battery technology companies remained the top VC-funded business in the energy storage sector. Other top businesses included battery recycling, nickel-based battery technology, energy storage downstream, and materials and components companies.

As part of the initiatives propounded by the Obama administration, investors are announcing US\$130 million in new funding commitments for energy storage. According to the report, in aggregate, these new commitments could lead to around US\$1 billion in investments& nbsp;in energy storage.

A total of about US\$7 billion support for domestic electric vehicle (EV) and stationary energy storage battery value chains will be paid out through the law. Energy-Storage.news" publisher Solar Media will host the 5th Energy Storage Summit USA, 28-29 March 2023 in Austin, Texas. Featuring a packed programme of panels, presentations and ...
