1. The new standard AS/NZS5139 introduces the terms "battery system" and "Battery Energy Storage System (BESS)". Traditionally the term "batteries" describe energy storage devices that produce dc power/energy. However, in recent years some of the energy storage devices available on the market include other integral

Use the correct wire size. The unit is rated for 10 A, and it is recommended that you use 12 gauge wire at 10 A. Smaller power/current requirements means to you get away with smaller diameter wire. There are plenty of tables on the internet to tell you which wire gauge to use for any current. Always connect the ground between your two sockets.
