

Energy storage power station project hd pictures

The project has an installed power generation capacity of 60 MW, an energy storage capacity of 300 MWh, and a long-term construction scale of 1,000 MW. Power station heat storage system. Energy storage is one of the key technologies for building a new power system and achieving the goal of "carbon peak and carbon neutrality".

These renewable energy sources will be used to charge the station's batteries during the grid load valley period by converting electrical energy into battery-stored chemical energy. Later, at peak grid load, the stored chemical energy will be converted back into electrical energy and transmitted to users. The station's energy storage technology uses vanadium ions ...
