This material can store a high amount of thermal energy in a small volume. On that way a compact storage of phase change material is arranged directly behind the photovoltaic module. The system can run as passive building facade with temperature balance effect or as heat storage for temporary use by active components.

The company focuses on stationary Energy Storage across all applications from Residential, Self - Consumption and Microgrid through to large scale stationary storage. We are Europe's first conference dedicated solely to energy storage since 2010. All of our Forum's culminate with the unique Building the Action Plan feature.
