The flywheel energy storage systems all communicate with a cluster master controller through EtherCAT. This protocol is used to ensure consistent low latency data transfer as is required for fast response times, which is <4ms to bus load changes. MODES OF OPERATION. There are 3 modes:

However, recent efforts are now aimed at reducing their operational expenditure and frequent replacements, as is the case with battery energy storage systems (BESSs). Flywheel energy storage systems (FESSs) satisfy the above constraints and allow frequent cycling of power without much retardation in its life span [1-3].

Amber Kinetics is the world's first and only long-duration flywheel flexible and rugged enough to meet the challenge. The Amber Kinetics flywheel is the first commercialized four-hour discharge, long-duration Flywheel Energy Storage System (FESS) solution powered by advanced technology that stores 32 kWh of energy in a two-ton steel rotor.

(1)  $E_{FW} = \frac{1}{2} J \omega^2$  Where,  $E_{FW}$  is the stored energy in the flywheel and  $J$  and  $\omega$  are moment of inertia and angular velocity of rotor, respectively. As it can be seen in (1), in order to increase stored energy of flywheel, two solutions exist: increasing in flywheel speed or its inertia. The moment of the inertia depends on shape and mass of the flywheel. Generally, rotor ...

Flywheel energy storage (FES) works by accelerating a rotor (flywheel) to a very high speed and maintaining the energy in the system as rotational energy. The energy is converted back by slowing down the flywheel. Most FES systems use electricity to accelerate and decelerate the flywheel, but devices that directly use mechanical energy are being developed.

Thanks to the unique advantages such as long life cycles, high power density, minimal environmental impact, and high power quality such as fast response and voltage stability, the flywheel/kinetic energy storage system (FESS) is gaining attention recently. There is noticeable progress made in FESS, especially in utility, large-scale deployment for the ...
