

Home energy storage box pictures and prices

Batteries for energy storage in buildings have been around for a long time in both stand-alone (off-grid) and commercial backup (UPS) power systems. However, over the last few years, domestic energy storage in the form of hybrid solar systems has started to gain momentum, even with the relatively high cost of batteries.

Grid, gas generators, panels, wind turbines, all produce energy that is pushed to our incredibly safe lithium iron phosphate battery storage system. Our expandable and maintenance-free battery storage system holds energy for when and where you need to use it, creating a perfect 24/7 energy backup for your home.*
