Power (measured in units of Watts (W) or kW, MW, GW) is the rate of use of energy (measured in Watt.hours (Wh) or kWh...). If the power is constant, the time to fully charge or fully discharge a storage system is given by  $\text{Time} = \frac{\text{Stored Energy}}{\text{Power}}$ . These quantities are shown schematically in Fig. 2, from [1], for large-scale energy storage systems.
