

Cubico Sustainable Investment have formed a joint venture (JV) to construct more than 1 GW of battery energy storage system (BESS) projects in Italy. According to the statement, the partners will place their wagers on Storantil's technical experience in the energy storage segment and Cubico's proficiency in initiating and expanding projects ...

Our recent article in IEEE Power and Energy Magazine offered a basic roadmap for establishing a predictive maintenance approach for a BESS. This approach relies on the identification of possible indicator-fault relationships during the design phase (for example, via a failure mode and effects analysis) and seeking new relationships via continuous post ...

Girolami also highlights the China-based BESS providers Sungrow, Huawei and CATL. Last year, competitor Nidec ASI announced orders from Italy of 1.35GW/5.4GWh by an unnamed company. Interestingly, the details and timeline closely match up with the projects being deployed by Enel.

Since it went to press, regulators in Italy approved new auction rules for grid-scale storage and gave the green light to a 200MW/800MWh battery energy storage system (BESS) project from UK developer Aura Power, while Eni Plenitude brought a 15MW BESS online.

The companies have exceeded their target of agreeing to co-developing 750MW of solar projects in Italy. Image: Powertis. Spanish solar company Soltec Power Holdings, through its subsidiary Powertis, has sold a controlling stake in 421MW of its solar PV projects and 90MW of energy storage in Italy to German investment firm Aquila Capital under a co-development ...

Tolling structures are very common in the infrastructure industry and are what makes the CO2 Battery bankable because it enables a long-term fixed revenue for Energy Dome from investment grade off-takers that could include investor-owned utilities (IOUs) or large independent power producers (IPPs).

Siemens has installed a battery storage system on behalf of Italian energy utility Enel on the Mediterranean island of Ventotene. The new lithium-ion battery-based storage system provides 500kW of output, and capacity of 600kWh. Ventotene is located around 100 kilometres south of Rome, and is disconnected from the Italian national power grid.

New technologies for energy storage are being developed as the industry continues to mature. Energy Dome, an Italian energy storage technology company founded in 2019, recently announced it will ...

The Italian Government recently implemented a new legislative framework regulating procedures for energy storage systems aimed at simplifying and fostering their development. Below, we provide an overview of the legislative framework and some of the issues that should be considered by operators interested in investing in the energy storage ...

Italian new energy storage maintenance

The results of Italy's main grid capacity market auction for 2025, published by Terna, show that energy storage represented 51.1% of the 174 MW of new capacity assigned.

Transmission system operator (TSO) Terna estimates Italy will need 9GW/71GWh of new energy storage to integrate its growing renewables pipeline, an average duration of just under 8 hours. That duration will be split between battery energy storage system (BESS) and select pumped hydro energy storage (PHES) projects, though even on the BESS ...

mentation of the new regulation - and the first energy storage auctions carried out by Terna under it - should take place in late 2023/early 2024, Taibi and Bigolin both say. Time-shifting and services "This planned energy storage capacity will do multiple things. One is time-shift-ing of renewables, very relevant in Italy

What is energy storage? Energy storage is the capture of energy for use at a later time, and a battery energy storage system is a form of energy storage. Battery energy storage has a variety of useful applications, such as balancing energy demand and supply for either the short or long term. This ensures the grid operates more efficiently.

Last week, UK battery storage developer Field announced it would enter Italy, while Innovo Group and Aquila Capital made similar moves last year. The residential energy storage market in Italy is already very strong, with the second-highest (321MWh) deployments in 2022 after Germany according to figures from trade body SolarPower Europe. This ...

Research firm LCP Delta recently forecast that after annual grid-scale deployments of just 20MW in the last few years, Italy would deploy 800-900MW in 2023/2024, second in scale only to the UK. In this piece, we interview executives from three developers looking to gain a foothold in the market: Aquila Clean Energy, Field and Innovo Group.

Enel Green Power will start building 1.6GW of battery storage projects in Italy this quarter, with the country's utility-scale market expected to soar in the next three years. The ...

Internationally, we have already implemented major projects such as the Tynemouth stand-alone storage system in the UK and the La Cabaña photovoltaic plant in Chile, which is equipped with a Battery Energy Storage System that ensures its efficiency and stability.

Energy Dome, an Italian energy storage technology company founded in 2019, announced the close of its \$11M Series A fundraise. The company will use the proceeds to complete the construction of its CO2 Battery demonstration project in Sardinia, Italy, and to accelerate the growth of the business.

Weber gave a speech on the final day of the Energy Storage 2014 conference, taking place in Düsseldorf, Germany in which he said: “The energy storage market is in the same situation today as

photovoltaics ten years ago; only development in the area of storage must proceed significantly faster.”

Italy's energy storage structure is also dominated by residential storage, which accounts for more than 80% of new installations. In December 2023, the EU greenlit Italy's energy storage program, earmarking a hefty investment of EUR17.7 billion.

But, many more are coming, as Energy-Storage.news explored in a special feature for Vol.35 of PV Tech Power, Solar Media's quarterly technical journal for the downstream solar and storage industries. While the first half was one of growth, the second quarter saw the first sequential fall in deployments in nine quarters.

Figures by industry group Italia Solare put the current size of the Italian energy storage sector at approximately 450MW of total installed capacity. Italian transmission system operator (TSO) Terna said that 1GW of storage linked to solar farms will be needed by 2025 to help maintain system adequacy, with additional 6GW of utility-scale ...

Paris, 20 October 2023 - NHOA Energy, the company of NHOA Group (NHOA.PA, formerly Engie EPS) dedicated to energy storage, announces that it has been selected as turnkey ...

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage in Italy. It will be ...

The new mechanism is specifically designed to address these issues. In today's article, our first in a series on Italian storage investment, we set out how the mechanism works, what volumes of storage are likely to be procured and what the implications are for BESS investors. The mechanism in a nutshell

The second edition of RENMAD Storage Italia (April 2-3, 2025) will bring together leading experts and industry leaders to discuss the evolving energy storage landscape, exploring both the opportunities and challenges ahead. Be part of this gathering of 300 innovative executives, as they discuss strategies to develop, finance, build, and operate ...

The report is a deep-dive into the suitability of different technologies for deploying the 71GWh of new large-scale energy storage that Terna forecasts Italy will need to decarbonise its energy system in a "Fit-for-55" scenario.
