

The business case for energy storage in Japan is currently centred around a 20-year fixed-price contract acquired through the long-term decarbonisation auction, presenting a low-risk model. However, the merchant business model in Japan has the potential to unlock significant upside and result in higher returns, making it an attractive opportunity.

This is due to the island offering plenty of land for large-scale renewables, but lacking grid capacity and relatively little interconnection with the rest of Japan, leading its regional power company Hokkaido Electric, to stipulate that all new renewable energy facilities must be paired with a certain amount of energy storage. Energy-Storage ...

Our specialty at Shibui is the collection and restoration of tansu, a term given to the antique cabinetry of Japan made principally between 1860 and 1910, the bulk of the Meiji period. Straddling a line between furniture and folk art, tansu developed from the Japanese need for storage that would not clutter their small living spaces. Accordingly, most tansu are portable ...
