

Jianchun Jiang's 360 research works with 6,000 citations and 4,174 reads, including: Van Krevelen diagrams based on machine learning visualize feedstock-product relationships in thermal conversion ...

Feng JIANG, Professor (Associate) | Cited by 685 | of Nanjing Tech University, Nanjing | Read 27 publications | Contact Feng JIANG ... A 20-foot latent cold energy storage device integrated with a ...

Zhenjiao Jiang; Lisa Maria Ringel; ... Numerical simulation of a high-temperature aquifer thermal energy storage system coupled with heating and cooling of a thermal plant in a cold region, China.

Mingwei Jiang's 10 research works with 109 citations and 239 reads, including: Resolving Deactivation of Low-Spin Fe Sites by Redistributing Electron Density toward High-Energy Sodium Storage

High-energy electrolytic Zn//MnO₂ batteries show potential for grid-scale energy storage, but the severe hydrogen evolution corrosion (HEC) caused by acidic electrolytes results in subdued durability.

Although T and P symmetries are individually absent in MnSe, due to static/dynamic C_{3v} point symmetry and magnetic moments of Mn atoms, the combined PT symmetry is still ...

Yajie JIANG | Cited by 724 | of The University of Hong Kong, Hong Kong (HKU) | Read 27 publications | Contact Yajie JIANG ... Distribution Power Loss Minimization of Energy Storage Systems in DC ...

High-temperature resistance and ultra-fast discharging of materials is one of the hot topics in the development of pulsed power systems. It is still a great challenge for dielectric materials to ...

Graphene and two-dimensional transition metal carbides and/or nitrides (MXenes) are important materials for making flexible energy storage devices because of their electrical and mechanical properties. It remains a ...

Heng Jiang currently works at the Department of Chemistry, Oregon State University. Heng does research in Materials Engineering, Electrochemistry and Mathematical Chemistry. ... Energy storage ...

Chunlei JIANG, professor-level senior engineer | Cited by 2,282 | | Read 26 publications | Contact Chunlei JIANG ... (CIBs) are attractive candidates for energy storage because Ca²⁺ has low ...

The findings elucidate that the initial charging of Na₃V₂(PO₄)₃ leads to the extraction of Na⁺, resulting in the formation of an Na⁺-depleted phase corresponding to NaV₂(PO₄)₃.

Using a three-pronged approach -- spanning field-driven negative capacitance stabilization to increase intrinsic energy storage, antiferroelectric superlattice engineering to ...

Jiang energy storage gaote

It is still a great challenge for dielectric materials to meet the requirements of storing more energy in high-temperature environments. In this work, lead-free ...

Rechargeable zinc-ion batteries (ZIBs) with mild aqueous electrolytes are one of the most promising systems for large-scale energy storage as a result of their inherent safety, low cost ...

Xin Jiang's 23 research works with 304 citations and 3,855 reads, including: Hydrogen gas diffusion behavior and detector installation optimization of lithium ion battery energy-storage cabin

DC storage system (battery) is also facing several issues like life cycle, cost, weight, uncertainty issue, performance, safety, interfacing with electronic component and protection and hence it ...

Battery energy storage systems (BESS) with high electrochemical performance are critical for enabling renewable yet intermittent sources of energy such as solar and wind. In recent years, numero ...

Chuanwen Jiang's 85 research works with 2,318 citations and 11,136 reads, including: Resilience enhancement strategy of multi-energy coupling distribution network considering movable energy ...

Xinyi Jiang's 3 research works with 42 citations and 235 reads, including: Two-step Optimal Allocation of Stationary and Mobile Energy Storage Systems in Resilient Distribution Networks

The practical implementation of aqueous Zn-ion batteries (ZIBs) for large-scale energy storage is impeded by the challenges of water-induced parasitic reactions and uncontrolled dendrite growth.

Supercapacitors are widely used in China due to their high energy storage efficiency, long cycle life, high power density and low maintenance cost. ... Yanchun Yang 1, Yinghui Han 2, 3 ...
