

@article{Zhang2023OptimalOO, title={Optimal operation of energy storage system in photovoltaic-storage charging station based on intelligent reinforcement learning}, author={Jing Zhang and Lei Hou and Bin Zhang and Xin Yang and Xiaohong Diao and Linru Jiang and Feng Qu}, journal={Energy and Buildings}, year={2023}, url={https://api ...

In this section, EV mobile trajectory is formulated first based on a trip chain and Dijkstra algorithm. Then flexible charging of EV is modeled, including EV trip time, SOC ...

Modeling results showed that the total net present value of a photovoltaic power charging station that meets the daily electricity demand of 4500 kWh is \$3,579,236 and that the cost of energy of ...

Abstract. The photovoltaic-energy storage-charging supply chain with mobile power supply as the core provides a feasible way to promote the effective consumption of photoelectric, but the efficiency of its distribution process is limited by information asymmetry and security problems, and it is urgent to optimize the distribution of mobile power supply.

Mobile Charging Station (a) Mobile Charging Station (b) Fig.1. MCS working mode; (a) on-grid charging mode; (b) off-grid charging mode. 432 Tinton Dwi Atmaja and Amin / Energy Procedia 68 (2015) 429 âEUR" 437 4. Energy storage for MCS MCS unit should be equipped with designated energy storage to conduct optimum charging to EV.

Similar to information dissemination, special nodes, like buses (trucks), can act as energy sources to EVs that need charging, in order to increase travel time. These vehicles, from now on called ...

Dynamic wireless charging (DWC) technology, a novel way of supplying vehicles with electric energy, allows the vehicle battery to be recharged remotely while it is moving over power tracks, which ...

The electric vehicle energy management: An overview of the energy system and related modeling and simulation ... A SHEV is composed of an ICE that is exclusively used to power an electric motor while a BPEV relies only on energy stored by charging a ... Research on calendar life degradation e.g. Wu et al. reported a 20 mAh drop in capacity due ...

Request PDF | Real-time energy management of photovoltaic-assisted electric vehicle charging station by markov decision process | With the rapid development of electric vehicles (EVs), the ...

1 INTRODUCTION. With the large-scale access of new power services such as distributed renewable energy power sources and intelligent power transmission and distribution devices, the centralized control mode adopted by the traditional power system is difficult to apply to the existing scenarios [].Meanwhile, with the

large-scale access of intelligent terminal ...

Many cutting-edge studies on collaborative data gathering and charging (CDAC) assume that the mobile vehicle (MV) has enough energy to charge the sensors as well as collect data from them. The current studies also took into account that the sensors always receive full charge from the MV, resulting in a wireless rechargeable sensor network (WRSN) ...

Electric vehicles (EVs) are prone to spontaneous combustion during charging, which can lead to safety accidents. Therefore, it is critical to accurately obtain the charging crises of EVs for timely fault identification and early warning. This paper proposes a hybrid convolutional neural networks (CNN) and bi-directional gated recurrent unit (BiGRU) dynamic early warning ...

This makes mobile EV charging a convenient and dependable option for various situations. Choosing the Right Mobile Charger: When selecting a mobile EV charger, consider factors like compatibility with your vehicle, the type of battery used (such as LiFePO₄ for its efficiency and safety), and the charging speed. These elements are crucial to ...

The photovoltaic-storage charging station consists of photovoltaic power generation, energy storage and electric vehicle charging piles, and the operation mode of which is shown in Fig. 1. The energy of the system is provided by photovoltaic power generation devices to meet the charging needs of electric vehicles. ... Linru Jiang: Formal ...

Keywords: electric vehicle integration, electricity system reliability, transportation network, distributed generation, electric vehicle charging service reliability. Citation: Xue P, Xiang Y, Gou J, Xu W, Sun W, Jiang Z, Jawad S, Zhao H and Liu J (2021) Impact of Large-Scale Mobile Electric Vehicle Charging in Smart Grids: A Reliability ...

Moreover, a coupled PV-energy storage-charging station (PV-ES-CS) is a key development target for energy in the future that can effectively combine the advantages of photovoltaic, energy storage ...

Jiang"su Linchrtech New Energy Technology Co.Ltd (hereinafter referred to as"Jiang"su Linchrtech") was founded in September 2020,the core team comes form Emerson,a Fortune 500 business.And new energy leading enterprise TELD in domestic.the company has plentiful industry experience and product R& D technology.We successively attianed the awards of "DongWu ...

mobile charging systems (MCSs)with a high storage Capacity and a mobile charging system for electric vehicles is presented in [12]. These stations can be a solution when the electrical infrastructure of the local grid is unable to support high power fast charging stations. Smart scheduling strategies can be profitably used to man-age the (PEV ...

As illustrated in Figure 9, due to the uncertainty of photovoltaic output, there are two charging methods for the charge and discharge strategy of mobile energy storage: one is during 3:00-7:00 when the electricity price is lower, mobile energy storage utilizes grid electricity for charging; the other is during 14:00-16:00 when the load is ...

The robot brings a mobile energy storage device in a trailer to the EV and completes the entire charging process without human intervention. Sprint and Adaptive Motion ...

The high share of electric vehicles (EVs) in the transportation sector is one of the main pillars of sustainable development. Availability of a suitable charging infrastructure and an affordable electricity cost for battery charging are the main factors affecting the increased adoption of EVs. The installation location of fixed charging stations (FCSs) may not be completely ...

In order to address the challenges posed by the integration of regional electric vehicle (EV) clusters into the grid, it is crucial to fully utilize the scheduling capabilities of EVs. In this study, to investigate the energy storage characteristics of EVs, we first established a single EV virtual energy storage (EVS) model based on the energy storage characteristics of EVs. ...

Research on Emergency Distribution Optimization of Mobile Power for Electric Vehicle in Photovoltaic-Energy Storage-Charging Supply Chain Under the Energy Blockchain. Sixiang ...

The mobile charging vehicle routing problem with time windows and recharging services. Comput Intell Neurosci, 2018 (2018) Google Scholar [45] ... Optimal management of mobile battery energy storage as a self-driving, self-powered and movable charging station to promote electric vehicle adoption. Energies, 14 (3) (2021), p. 736.

1 INTRODUCTION. With the large-scale access of new power services such as distributed renewable energy power sources and intelligent power transmission and distribution devices, the centralized control mode ...

This study researches the dynamical location optimization problem of a mobile charging station (MCS) powered by a LiFePO₄ battery to meet charging demand of electric vehicles (EVs).

DOI: 10.1109/ACCESS.2023.3281552 Corpus ID: 259019861; Research on Electric Vehicle Charging Safety Warning Based on A-LSTM Algorithm @article{Diao2023ResearchOE, title={Research on Electric Vehicle Charging Safety Warning Based on A-LSTM Algorithm}, author={Xiaohong Diao and Linru Jiang and Tian-you Gao and Liang Zhang and Junyu Zhang ...

Application example of Mobile Energy Disseminator: A. Contactless charging is used to deliver charging to a bus B. LTE communication between M ED and EV C. Electric vehicle recharges from the bus ...

Jiang energy storage mobile charging vehicle

A collaborative planning model for electric vehicle (EV) charging station and distribution networks is proposed in this paper based on the consideration of electric vehicle mobile energy storage. As a mobile charging load, EVs can interact with the power grid. Taking EVs as planning considerations, subsidies for EVs are used to shift the ...

The traditional charging pile management system usually only focuses on the basic charging function, which has problems such as single system function, poor user experience, and inconvenient management. In this paper, the battery energy storage technology is applied to the traditional EV (electric vehicle) charging piles to build a new EV charging pile ...
