

Herein, the design of porous carbon nanofibers/SnS₂ composite (SnS₂@N-HPCNFs) for high-rate energy storage, where the ultrathin SnS₂ nanosheets are nanoconfined in N-doped carbon nanofibers with tunable void spaces, is reported. The highly interconnected carbon nanofibers in three-dimensional ...

An electrode material for electrochemical energy storage is one of the key components for high performance devices. In a variety of electrochemical energy storage systems, carbon materials, especially the lately emerged carbon nanomaterials including the carbon nanotube and graphene, have been playing a very important role and brought new vitality to the development and ...

Advances and perspectives of ZIFs-based materials for electrochemical energy storage: Design of synthesis and crystal structure, evolution of mechanisms and electrochemical performance. Huayu Wang, Qingqing He, Shunfei Liang, Yang Li, ... Lingyun Chen ... Jie Jiang, Xiangjun Meng, Ling Li, Shun Guo, ... Shan-Tao Zhang. Pages 383-390 View PDF.

Lianbo Ma, Jiang Cui, Shanshan Yao, Xianming Liu, ... Jang-Kyo Kim. Pages 522-554 View PDF. Article preview. select article Reviewing the fundamentals of supercapacitors and the difficulties involving the analysis of the electrochemical findings obtained for porous electrode materials. ... [Energy Storage Mater. 25 (2020) 702-713]

Energy storage and conversion (ESC) devices with high efficiency, versatility, and adaptability have drawn growing attentions in pursuit of cheap, ... Yanqiu Jiang obtained his PhD (2020) degree from Zhejiang University under the supervision of professor Gao. currently, he is doing postdoctoral research at the college of chemical and biological ...

Aqueous K-ion batteries (AKIBs) are promising candidates for grid-scale energy storage due to their inherent safety and low cost. However, full AKIBs have not yet been reported due to the limited availability of suitable electrodes and electrolytes. Here we propose an AKIB system consisting of an Fe-substituted Mn-rich Prussian blue $K_xFe_yMn_{1-y}[Fe(CN)_6]_w \cdot zH_2O$...

In this comprehensive review, NaTi₂(PO₄)₃ has raised the rate capabilities, cycling stability, and mass loading of rechargeable SIBs and NHCs to commercially acceptable levels and the major challenges and perspectives regarding the prospects for the use of NTP-based electrodes in energy storage systems have been summarized. HighlightsFor the first time, we fully presented ...

Liquid air energy storage (LAES) is becoming an attractive thermo-mechanical storage solution for decarbonization, with the advantages of no geological constraints, long lifetime (30-40 years), ...

Various properties of sodium ion batteries deteriorate severely when dropping to subzero temperature. Herein, we reveal an accelerated charge-transfer mechanism for high-voltage Na₃V₂(PO₄)₂F₃ cathode through

constructing weakly-solvating architecture, which endows it with superior temperature adaptability (capacity retention of $C - 25^{\circ}C / C 25^{\circ}C$...

Benefitting from the staged [2+6]-electron pathway, the Zn-NO₃ - battery enabled efficient energy supply with the highest output voltage of 0.70 V, an energy density of 566.7 Wh L⁻¹ at 10 mA cm⁻² and a power density of 14.1 mW cm⁻², which are far higher than recently reported state-of-the-art results using a direct eight-electron ...

As the world moves toward electromobility and a concomitant decarbonization of its electrical supply, modern society is also entering a so-called fourth industrial revolution marked by a boom of electronic devices and digital technologies. Consequently, battery demand has exploded along with the need for ores and metals to fabricate them. Starting from such a ...

Liu Zhang Ouyang, Jian Shan Ye, Jiang Wen Liu, ... Min Zhu. Pages 222-228 View PDF. Article preview. select article Hierarchical ball-in-ball structured nitrogen-doped carbon ...

In addition, the energy-dispersive X-ray spectroscopy (EDX) mapping of the SnS₂ @N-HPCNFs electrode indicated the uniform distribution of C, N, O, Sn, and S elements in the electrode, which illustrated that SnS₂ nanosheet was completely confined into the 1D carbon nanofibers (Figure S3, Supporting Information).The crystal structure of the SnS₂ @N-HPCNFs ...

The growing demand for high-power-density electric and electronic systems has encouraged the development of energy-storage capacitors with attributes such as high energy density, high capacitance density, high voltage and frequency, low weight, high-temperature operability, and environmental friendliness. Compared with their electrolytic and film ...

Mingwei Jiang, Zhidong Hou, Lingbo Ren, Yu Zhang, Jian-Gan Wang. Pages 618-640 View PDF. ... select article Corrigendum to "Significant increase in comprehensive energy storage performance of potassium sodium niobate-based ceramics via synergistic optimization strategy", energy storage materials 45 (2022) 861-868.

Owing to the excellent abundance and availability of sodium reserves, sodium ion batteries (NIBs) show great promise for meeting the material supply and cost demands of large-scale energy storage systems (ESSs) used for the application of renewable energy sources and smart grids. However, the cost advantages

Zinc-air batteries deliver great potential as emerging energy storage systems but suffer from sluggish kinetics of the cathode oxygen redox reactions that render unsatisfactory cycling lifespan. The exploration on bifunctional electrocatalysts for oxygen reduction and evolution constitutes a key solution, where rational design strategies to ...

Energy Technology is an applied energy journal covering technical aspects of energy process engineering, including generation, conversion, storage, & distribution. Solid-state batteries (SSBs), with desirable safety, high-energy density, wide temperature tolerance, and simple packaging, are one of the most promising candidates for the next ...

2D transition metal carbides and/or nitrides (MXenes), by virtue of high electrical conductivity, abundant surface functional groups and excellent dispersion in various solvents, are attracting increasing attention and showing competitive performance in energy storage and conversion applications.

Redox flow batteries (RFBs) are promising candidates for stationary energy storage devices for modern grids based on intermittent green energy generation. 1 RFBs are unique since electrolyte and electrode are spatially separated, which has the advantages of safety, simplifies scalability and independent tuning of the energy and power output. 2 Besides ...

The Supporting Information is available free of charge on the ACS Publications website at DOI: 10.1021/acssuschemeng.7b03558.. Description of leakage test, crystallinity of paraffin used in this study, SEM-EDS spectra of the EP Pa-0 and the EP Pa-40 systems, SEM images of EP Pa-0, EP Pa-10, and EP Pa-20 systems (1000 \times magnification), SEM images of ...

This paper proposes a novel approach to improve the energy storage capacity of LAES and eliminate the limitations of AP on energy storage time. This approach involves using ...

Increasing research interest has been attracted to develop the next-generation energy storage device as the substitution of lithium-ion batteries (LIBs), considering the potential safety issue and the resource deficiency [1], [2], [3] particular, aqueous rechargeable zinc-ion batteries (ZIBs) are becoming one of the most promising alternatives owing to their reliable ...

Ocean wave energy is a promising renewable energy source, but harvesting such irregular, "random," and

mostly ultra-low frequency energies is rather challenging due to technological limitations. Triboelectric nanogenerators (TENGs) provide a potential efficient technology for scavenging ocean wave energy.

The heat from solar energy can be stored by sensible energy storage materials (i.e., thermal oil) [87] and thermochemical energy storage materials (i.e., $\text{CO}_3\text{O}_4/\text{CoO}$) [88] for heating the inlet air of turbines during the discharging cycle of LAES, while the heat from solar energy was directly utilized for heating air in the work of [89].
