

Jolywood commercial park energy storage business

Founded in 2008 and publicly listed in 2014 (Stock code SZ300393), Jolywood is a state-level high-tech enterprise specializing in the R& D and manufacture of solar power products and associated technology.

Jolywood business park belongs to the energy storage industry. Jolywood business park belongs to the energy storage industry. State of the U.S. Energy Storage Industry: 2022 Year in. Our annual lookback at the year in energy storage covers advances in the U.S. market, including deployment trends, policy and regulatory updates; the state of the ...

From July 10th to 11th, Solar & Storage Live Vietnam 2024 was held at SKY EXPO in Ho Chi Minh City. As a leader in n-type TOPCon technology, Jolywood Solar showcased the high-efficiency n-type modules, working closely with strategic partners in Vietnam to drive the energy transition in Southeast Asia.

Jolywood (Suzhou) Sunwatt Co. Ltd. (SZ: 300393) (Jolywood), the world's leading supplier of N-type high efficiency bifacial solar cells and modules, was a key participant in the 2018 Belt and Road Energy Ministerial Conference and International Forum on Energy Transition ("the Conference") to discuss energy cooperation and the future of ...

Jolywood recently commissioned a 1.5GW TOPCon solar cell factory in Taizhou, in China's Zhejiang province. "With this new manufacturing facility, our TOPCon solar cell production capacity has now reached 3.6GW," a company spokesperson told pv magazine.

Jolywood has announced the signing of a cooperation agreement with Romanian PV project integrator and contractor Romeelectro, which currently controls 1GW of projects in Italy.

Jolywood will continue on its own path in developing n-type technology, from N-PERT to N-TOPcon, and then on to n-type TBC and n-type TBC with perovskite. "The cell business is doing well now, and this year many companies engaged in the p-type field have also turned to n-type R& D and manufacturing.

fields. The company has five intelligent production bases in Changzhou, Jiangsu/Tianjin/Suining, Sichuan/Juancheng, Shandong/Xiangyang, Hubei.

While the N-TOPCon production line Jolywood built in earlier years cost as much as RMB1 billion (US\$150 million) per GW, the investment for the same today has fallen to RMB200 million (US\$30 million). Lin continued: "The investment on the first GW of N-type was around 0.7-1 billion, even more expensive than HIT today.

With its commitment to TOPCon greater than any other company, Jolywood has gradually built up its advantage in this field through six years of development and patent accumulation. Jolywood's n-type cell capacity is now over 2GW, and the company has also achieved the highest TOPCon efficiency in terms of mass production.

"Through continuous technological innovation, Jolywood has successfully developed various cutting-edge technologies such as impurity extraction in silicon wafer body region, a local polysilicon layer, hydrogen content regulation of polysilicon film, new metal damage repair, and ultra-fine gate line printing," the company said.

Today, Jolywood has accumulated global backsheet shipments of 100GW and established an n-type bifacial cell and module capacity of 2GW, becoming a global leader in the first former sector and the world's largest N-type TopCON cell manufacturer, with total assets of RMB8 billion (US\$1.2 billion).
