The Energy Sector Report provides useful information pertaining to the performance of the energy sector in Zambia. The report highlights the various programs, projects and initiatives undertaken during the period under review and aimed at improving the performance of the sector.

1. Introduction. Industrial parks are distributed throughout the world. They concentrate on intensive production or service activities on a single piece of land [1]. There are approximately 2500 national and provincial industrial parks in China, with a total area of more than 30,000 square kilometers [2] these industrial parks, 87 % of energy originates from coal-fired ...

We occupy a 150,000 sqft manufacturing plant located in Plot No. 825721/1, Katanga Road, Chinika Industrial Area, Lusaka, Zambia Po Box 34044 that employs over 100 permanent staff. Our American technology allows us to manufacture over 600 tanks a day that converts to a daily water storage capacity of over 1.8 Million liters.

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

Lusaka - Urban Infrastructure and Services Key statistics / information: o Energy access for households: 70.8% of households have electricity (compared to 27.9% national average). 65.7% of households use solid fuel for cooking (compared to 87.6% at national level). o Energy access for business: 17% of firms have identified energy access
