Pumped storage stations offer the electricity system a source of extra power quickly but it takes the right combination of geographical features to make it work. Ben Cruachan just so happens to be one of the spots where the landscape makes it possible.

It is a "water battery" -- rudimentary in concept, intricately engineered and a highly effective way of storing energy. The Tâmega plant takes excess electricity from the grid, ...

Known as mountain gravity energy storage (MGES), the technology works by simply transporting sand or gravel from a lower storage site to an upper elevation, storing potential energy from the upward journey and releasing it on the way back down. The higher the height, the greater the amount of stored energy, claims the research.

Evolve and TransAlta Corporation (TransAlta) have partnered to develop the Tent Mountain Pumped Hydro Energy Storage (TM-PHES) project. The TM-PHES will repurpose the historical Tent Mountain Mine which is a reclaimed legacy coal mine, located in the Crowsnest Pass, approximately 16 km west of the township of Coleman, Alberta.

The Dinorwig Power Station (/ d ? ' n ? :r w ? ? /; Welsh: [d?'n?rw??]), known locally as Electric Mountain, or Mynydd Gwefru, is a pumped-storage hydroelectric scheme, near Dinorwig, Llanberis in Snowdonia national park in Gwynedd, north Wales. The scheme can supply a maximum power of 1,728 MW (2,317,000 hp) and has a storage capacity of around 9.1 GWh ...
