Iraq has struck a major deal with France's TotalEnergies company, bringing in \$27 billion in foreign investment to build up natural resource development and electricity ...

As renewable energy sources such as wind and solar power become more prevalent, there is an increasing need for effective and efficient energy storage solutions. Energy storage systems ...

The PHS mechanical indirect electrical energy storage system is a great way to store large amounts of off-peak energy; however, it faces geographical challenges when siting such a ...

The new IEA report, Iraq's Energy Sector: A Roadmap to a Brighter Future, maps out immediate practical actions and medium-term measures to tackle the most pressing problems in Iraq's electricity sector. The analysis finds Iraq has huge potential to cut its electricity network losses, which are among the highest in the world.

Transformation of Iraq into a regional energy hub: Enhancing an interconnected grid to be stronger, smarter, more reliable, and more sustainable. Deployed together as a ...

While Iraq has expressed a desire for cooperation with Gulf states in the past, its proximity to Iran and its instability hindered investment opportunities. Iraq's political system, which has been in place for two decades now, has shown its resilience in major crises such as terrorism, secessionist movements, and large-scale protests.

Despite the extraordinary challenges of war in recent years, Iraq has made impressive gains, nearly doubling the country's oil production over the past decade. But the turmoil has also undermined the country's ability to
