

The long-duration storage company announced last week that it has been invested in by the European Innovation Council Fund (), the investment arm of the EIC, set up by the European Commission to support technologies at pre-commercialisation stage that offer promise within the European Union (EU). The EIC Fund's EUR5 million commitment brings the ...

The MITEI report shows that energy storage makes deep decarbonization of reliable electric power systems affordable. "Fossil fuel power plant operators have traditionally responded to demand for electricity -- in any given moment -- by adjusting the supply of electricity flowing into the grid," says MITEI Director Robert Armstrong, the Chevron Professor ...

SolarEdge posts \$1.21 billion net loss with 189 MWh energy storage sold, in Q3'24 SolarEdge reported \$260.9 million in revenue for the third quarter of 2024, down from \$725.3 million in the same quarter last year, while shipping 189 MWh of batteries for PV applications along with its large inverter business.

Under the direction of the national "Guiding Opinions on Promoting Energy Storage Technology and Industry Development" policy, the development of energy storage in China over the past five years has entered the fast track. A number of different technology and application pilot demonstration projects

A key component of that is the development, deployment, and utilization of bi-directional electric energy storage. To that end, OE today announced several exciting developments including new funding opportunities for energy storage innovations and the upcoming dedication of a game-changing new energy storage research and testing facility.

Energy storage as a utility transmission and distribution (T& D) asset in New York (also known as a non-wires alternative to building expensive T& D infrastructure), DC-coupled solar-plus-storage in Massachusetts and the deployment of mobile battery energy storage to provide locational flexibility were the three case studies featured.

Energy storage and electric vehicle (EV) industry interest alike were attracted towards what Rimac, an OEM for high-end EVs, would produce when it turned its focus to stationary energy storage. And Energy-Storage.news was first to bring you the big reveal in September, as Rimac product engineering manager Roger Moorhouse unveiled SineStack, a ...

As reported by Energy-Storage.news earlier this month as Federal energy minister Chris Bowen and energy ministers from Australian states and territories met and decided in principle to launch a scheme to tender for dispatchable renewable energy on a competitive basis.. It is also expected that a Renewable Energy Storage Target (REST) scheme will be ...

The IEA offices in Paris. Image: IEA. Only half of the energy storage needed to properly integrate the

News on energy storage policy

potential solar PV additions made globally by 2030 will be deployed based on current policies, the International Energy Agency (IEA) ...

6 · The latest news on energy policy & regulation affecting the utility industry. ... LS Power has identified 4.4 GW in potential capacity and storage projects in PJM totaling \$8 billion but said ...

Eos Energy Enterprises, Inc. has announced a new customer agreement with City Utilities to provide 216 MWh of energy storage for two project sites in Missouri. SSE Renewables has acquired a 120 MW/240 MWh battery storage project in Ireland's Midlands ...

The U.S. Department of Energy on Thursday finalized a \$475 million loan for Li-Cycle Holdings, giving the metals recycler a financial lifeline to build a New York battery processing facility seen ...

Energy Storage Special Report 2019, from the editorial teams behind Energy-Storage.news and PV Tech, brings you no less than seven feature articles and technical papers looking at everything from the policy and regulatory initiatives that still need to happen, to bankability and profitability of ESS, system technologies and architecture, all the way to ...

Rapid technology improvements and trade policy risk pose a dilemma for US battery storage procurement decision-makers, CEA consultants say. ... for Clean Energy Associates. Jeff Zwijsack is CEA's senior manager of energy storage. Upcoming Event. Energy Storage Summit USA 2025. 18 March 2025 ... Energy-Storage.News is part of the Informa ...

"As we build our clean energy future, reliable energy storage systems will play a key role in protecting communities by providing dependable sources of electricity when and where it's needed most, particularly in the aftermath of extreme weather events or natural disasters," said U.S Secretary of Energy Jennifer M. Granholm.

The Energy Storage Report is now available to download. In it, you'll find the best of our content from Energy-Storage.news Premium and PV Tech Power, as well as new articles covering deployments, technology, policy and finance in the energy storage market.. Energy storage continues to go from strength to strength as a sector, with the buildout in ...

As Energy-Storage.news reported back earlier this year, the report was adopted by the European Parliament with an overwhelming majority, ... Ville Niinistö MEP said that now is a "key period for energy policy in Europe," and that energy storage is a big part of making the transition to renewables as economically and sustainably as possible ...

The 1500GW target is double what BloombergNEF has forecast is scheduled to be online based on current deployment pipelines, as reported by Energy-Storage.news this week. Energy-Storage.news" publisher Solar Media will host the 1st Energy Storage Summit Australia, on 21-22 May 2024 in Sydney, NSW. Featuring a

packed programme of panels ...

As the report details, energy storage is a key component in making renewable energy sources, like wind and solar, financially and logistically viable at the scales needed to decarbonize our power grid and combat climate change.

Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use more flexible. Goals that aim for zero emissions are more complex and expensive than net-zero goals that use negative emissions technologies to achieve a reduction of 100%.

Speaking on a panel debating the policy landscape for long-duration storage at the ongoing Energy Storage Summit 2021, organised by Energy-Storage.news publisher Solar Media, Robert Hull, managing director at energy advisory Riverswan and formerly managing director of UK energy market regulator Ofgem, highlighted how while overall policy ...

The Energy Storage Summit USA is the only place where you are guaranteed to meet all the most important investors, developers, IPPs, RTOs and ISOs, policymakers, utilities, energy buyers, service providers, consultancies and technology providers in one room, to ensure that your deals get done as efficiently as possible.

All of the states with a storage policy in place have a renewable portfolio standard or a nonbinding renewable energy goal. Regulatory changes can broaden competitive access to storage such as by updating resource planning requirements or permitting storage through rate proceedings.

Energy-Storage.News Premium reports back from an in-depth discussion of battery storage in the Philippines with panellists including DOE Assistant Secretary Mario C. Marasigan. At the Energy Storage Summit Asia 2024 last month, Japan and the Philippines were broadly identified as two standout markets in terms of recent progress. The conference ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil fuel ...

The US energy storage industry saw its highest-ever first-quarter deployment figures in 2024, with 1,265MW/3,152MWh of additions. ... said ACP vice president of markets and policy John Hensley, that the association look forward to cheering on. ... Energy-Storage.News is part of the Informa Markets Division of Informa PLC. Informa; About Us ...

Redoxblox uses a chemically reactive metal oxide to pack more energy into its thermochemical storage systems aimed at industrial decarbonization. (Redoxblox) The island has ambitious climate goals and a ton of rooftop solar, but has so far built few large-scale clean energy projects. Project Marahu ...
