

Specifically, for Xinjiang, Inner Mongolia, Qinghai, Gansu, and Tibet with huge PV power potential and sparse populations, it is most appropriate to prioritize the construction of ...

Yet, only limited information is available on its global potential and associated costs at a high spatiotemporal resolution. Here, we present a high-resolution global assessment of rooftop solar photovoltaics potential using big data, machine learning and geospatial analysis.

Victoria, M. et al. Solar photovoltaics is ready to power a sustainable future. *Joule*6, 1041-1056 (2021).  
Dunnett, S. et al. Harmonised global datasets of wind and solar farm locations and power. *Sci. Data*7, 130 (2020).  
Helveston, J. P., He, G. & Davidson, M. R. Quantifying the cost savings of global solar photovoltaic supply chains.

Solar photovoltaic power is gaining momentum as a solution to intertwined air pollution and climate challenges in China, driven by declining capital costs and increasing technical efficiencies.

Here we show that, by individually optimizing the deployment of 3,844 new utility-scale PV and wind power plants coordinated with ultra-high-voltage (UHV) transmission ...

The objective of this report is to present an action plan that will allow the Government of Vietnam to reach its goal of 12 GW of installed solar power capacity by 2030. As noted, the plan is ...

This study aims to compare different types of power systems that include large-scale solar and energy storage capacities, in order to determine the most profitable models. ...

Solar photovoltaic (PV) will become the major energy source in Northeast Asia with a generation share of more than 70%; wind energy will contribute to 18% of the generation. Decarbonisation ...

Combined solar power and storage as cost-competitive and grid-compatible supply for China's future carbon-neutral electricity system. Solar photovoltaic power is gaining momentum as a ...
