

Northern energy storage oil heater manufacturer

From high-efficiency boilers to high-performance furnaces and beyond, Boro Energy installs and services oil-fired heating equipment by all major brands and manufacturers. Whether your ...

Most modern oil furnaces convert 80% to 90% of heat energy into usable heat, operating at efficiencies that can lower heating bills. In contrast, electric heaters can reach nearly 100% conversion efficiency because almost all the electricity used, measured in kWh, is turned into heat, which affects their running costs.

Historically, heating oil was a common choice for its efficiency and warmth, but electricity, often used in zonal heaters, has gained traction with advances in technology, concerns about sustainability, and the reduction of greenhouse gas emissions.

It's clean, green and cost-effective, making it the perfect choice if you're living in a rural area off the grid. As your local independent supplier, we deliver home heating oil, commercial and agricultural heating oil and domestic, commercial and agricultural LPG. On time, every time and always with a smile.

Our policy provides cover for your main heating system when it is powered by: Gas boiler; Gas combination (combi) boiler; Gas condensing boiler; Electric boiler; Oil boiler; We are not able to ...

Heating oil systems, while potentially less convenient due to fuel delivery and storage requirements, can offer a more cost-effective solution for home heating in certain regions. The ...
