

Power companies dump energy

The world's sleekest dump sits on an island near the picturesque port of Bergen in Norway. Strictly speaking, the gleaming Northern Lights terminal is just the gateway to the actual dump, where carbon dioxide will be offloaded from ships and then pumped down into an aquifer 1.6 miles below the seabed, about 60 miles offshore, keeping it locked away.

o Sempra Energy and Energy Future Holdings Corp. -- On March 9, 2018, Sempra completed its acquisition of Energy Future Holdings Corp., which owns approximately 80 percent of Oncor Electric Delivery Company LLC, for \$9.45 billion in cash, after the previous \$9 billion deal with Berkshire Hathaway Energy was abandoned by Energy Future Holdings.
