1 Introduction. It is well known that the study of ferroelectric (FE) materials starts from Rochelle salt, $[KNaC_4H_4O_6] \cdot 4H_2O$ (potassium sodium tartrate tetrahydrate), which is the first compound discovered by Valasek in 1921. Looking back at history, we find that the time of exploring Rochelle salt may date back to 1665, when Seignette created his famous "sel ...
