Taking a proactive approach to the energy transition. Harbour has committed to the goal of net zero for our gross operated Scope 1 and 2 CO 2 equivalent (CO 2 e) emissions by 2035, with an interim target of 50 per cent reduction by 2030 against our 2018 baseline.. To achieve this, we will continue reducing our own emissions and mitigate the impact of any remaining emissions by ...

As a result of its acquisition of the Wintershall Dea asset portfolio in 2024, Harbour Energy is one of the largest oil and gas producers on the Norwegian Continental Shelf. Norway accounts for over a third of our daily production, making it the largest producing country in our portfolio.

Our UK offshore operated positions include the Greater Britannia Area, J-Area, AELE, Catcher Area and Tolmount Area. We also have material non-operated stakes in numerous long-life assets including Elgin/Franklin, Buzzard, West of Shetland (Clair, Schiehallion and Solan which is operated) and the Beryl Area.

Off the coast of Tierra del Fuego, Harbour has an interest in the CMA-1 (Cuenca Marina Austral 1) concession which forms the backbone of the country's energy supply. Today, around 16 per cent of Argentina's natural gas is produced from the CMA-1 concession which includes the Carina, Aries, Vega Pléyade and other smaller fields.
