

Seiko watch power reserve display

The movement inside these dual-time watches is Seiko's Caliber 6R64, which you'll note is one digit off from the 6R54 movements in the Prospex series; this is because in addition to its built-in GMT function and date display, this movement also drives an analog power-reserve indicator for the movement's 45 hours of running autonomy (which ...

Power reserve Operating for approx. 6 months (when fully charged) Functions. Overcharge prevention function; 24-hour hand; Equipped with small seconds hand; Chronograph up to 60 minutes in 1/5 second increments; Power reserve indicator; Date display
