When it comes to living off the grid, having a reliable and efficient battery storage system is essential. Luckily, there are numerous innovative solutions available, from lithium-ion batteries to flow batteries, allowing you to harness and store energy to power your off-grid lifestyle with ease.

Types of Inverters. There are several types of inverters that might be installed as part of a solar system. In a large-scale utility plant or mid-scale community solar project, every solar panel might be attached to a single central inverter. String inverters connect a set of panels--a string--to one inverter. That inverter converts the power produced by the entire string to AC.

The S6 (Series 6) hybrid energy storage string inverter is the latest Solis US model certified to IEEE 1547-2018, UL 1741 SA & SB, and SunSpec Modbus, providing economical zero-carbon power from an all-weather (Type 4X / IP 66) high-efficiency PV string inverter. This hybrid inverter can be DC-coupled to a variety of batteries, enabling a versatile off or on-grid solution.

There are four different energy storage operating modes available: (1) Self Use (2) Feed In Priority (3) Backup (4) Off Grid. You can turn these modes on and off by following this path: Advanced Settings > Storage Energy Set > Storage Mode Select > use the Up and Down buttons to cycle between the four modes and press Enter to select one.
