

# Tbilisi energy storage container project bidding

The bidding volume of energy storage systems (including energy storage batteries and battery systems) was 33.8GWh, and the average bid price of two-hour energy storage systems (excluding users) was \$1.33/Wh, which was 14% lower than the average price level of last year and 25% lower than that of January this year.

Based on partial statistics, there were 26 new energy storage bidding projects in June, with a combined capacity of 7.98GWh. Among them, framework procurement projects accounted for 4.4GWh, household energy storage projects accounted for 2.6GWh, and new energy distribution storage projects accounted for 0.9GWh.

The project will be developed in phases across two land parcels, with an additional 88,000m<sup>2</sup> of land available for future expansion. Upon completion of all three phases, Tbilisi Dry Port is expected to have a handling capacity of 286,000 TEUs, along with 100,000m<sup>2</sup> of warehouse space and an expanded car storage yard.

Renewable energy is the fastest-growing energy source in the United States. The amount of renewable energy capacity added to energy systems around the world grew by 50% in 2023, reaching almost 510 gigawatts. In this rapidly evolving landscape, Battery Energy Storage Systems (BESS) have emerged as a pivotal technology, offering a reliable solution for ...
