Ford's first mainstream modern EV, the Mustang Mach-E, also has a capable front trunk for those looking to do more with their car. And while it only offers 4.7 cubic feet of storage, that's more than enough for a suitcase or duffle bag. Like the F-150, it has an all-weather mat and drain plug.

While the trunk is usually quite boring on regular vehicles and simply used as a storage area for suitcases, gym bags, or other junk, modern electric cars take things to the next level. The best example is the Ford F-150 Lightning electric truck, which has an amazing powered frunk with additional uses.

Aim for a garage that is climate controlled for best storage. If you don't have a garage or don't have access to one, keeping your EV under a carport or shade awning is preferable to it being in direct sunlight.

Without the hulking internal combustion engine, the big multi-speed, multi-clutch transmission under the hood, exhaust system, the fuel tank and fuel pumps, and all the ancillary pieces, an EV can feel far more spacious on the inside than an otherwise similarly sized gasoline vehicle.

Electric vehicles (EVs) have a front trunk called a "frunk" because they no longer need the space for an engine, providing extra storage for EV owners. The Ford F-150 Lightning ...
