Aqueous rechargeable zinc-based batteries (ZBBs) are emerging as desirable energy storage systems because of their high capacity, low cost, and inherent safety. However, the further application of ZBBs still faces many challenges, such as the issues of uncontrolled dendrite growth and severe parasitic reactions occurring at the Zn anode.

Recent advances in lead-free dielectric materials for energy storage. / Zou, Kailun; Dan, Yu; Xu, Haojie et al. In: Materials Research Bulletin, Vol. 113, 05.2019, p. 190-201. Research output: Journal article publication > Short survey > Academic research > peer-review

Yu Dan, Haojie Xu, Kailun Zou, Qingfeng Zhang, ... X. Zhou, K. L. Ren, B. Neese, ... The energy storage performance and charge-discharge properties of Pb_{0.98}La_{0.02}(Zr_{0.35}Sn_{0.55}Ti_{0.10})_{0.995}O₃ ...

DOI: 10.1016/J.CERAMINT.2019.03.001 Corpus ID: 139608066; Superior energy-storage properties in (Pb,La)(Zr,Sn,Ti)O₃ antiferroelectric ceramics with appropriate La content @article{Dan2019SuperiorEP, title={Superior energy-storage properties in (Pb,La)(Zr,Sn,Ti)O₃ antiferroelectric ceramics with appropriate La content}, author={Yu Dan and Kailun Zou and ...

Abstract. Zinc-air batteries deliver great potential as emerging energy storage systems but suffer from sluggish kinetics of the cathode oxygen redox reactions that render ...

Haiqing Zhou, Fang Yu, Yuanyue Liu, Xiaolong Zou, Chunxiao Cong, Caiyu Qiu, Ting Yu*, Zheng Yan, Xiaonan Shen, Lianfeng Sun, Boris I. Yakobson*, James M. Tour* Nano research 6, 703-711 (2013) Interfacial thermal conductance of partially unzipped carbon nanotubes: Linear scaling and exponential decay

The rapid developments of the Internet of Things (IoT) and portable electronic devices have created a growing demand for flexible electrochemical energy storage (EES) devices. Nevertheless, these flexible devices suffer from poor flexibility, low energy density, and poor dynamic stability of power output during deformation, limiting their ...

Advanced 2D materials have spurred great interest as a new paradigm in pursuing improved energy storage performance. Herein, for the first time, antimonene is utilized as an effective active component for constructing highly deformable and editable freestanding film electrodes, as the basis of a supercapacitor with record-breaking electrode performance.

An overview of the state-of-the-art advances of multilayer structure energy storage dielectric but also the prospects that may open another window to tune the electrical performance of the electrostatic capacitor via designing a multilayers structure are covered. An electrostatic capacitor has been widely used in many fields (such as high pulsed power ...

A vertical flux-switching permanent magnet based oscillatingwave power generator with energy storage. / Zou, Yu; Cheng, Ka Wai Eric. In: Energies, Vol. 10, No. 7, 887, 06.2017. Research output: Journal article publication > Journal article > Academic research > peer-review

Carbon micro/nanocages have received great attention, especially in electrochemical energy-storage systems. Herein, as a proof-of-concept, a solid-state gas-steamed metal-organic-framework approach is designed to fabricate carbon cages with controlled openings on walls, and N, P dopants.
